I talked to Pete L. a few minutes ago and he thought we had decided to not use the conveyor. I think we should move on from the conveyor.

So do you think we should forget about it?

In going through notes, I think the conveyor idea was nixed and we stated we would be taking the concrete out in sections, approximately 18" x 18" and move that to the door- via wheel barrow, transfer to a skid steer bucket to the screening area that is yet to be located as it needs to be a low background reading, and then screen there and send the concrete to the roll off if clean and if not, it would be packaged and into storage. But we all think it should be clean.

Something we can put concrete or other solid material on to survey.
Gravity roller conveyor...pictured below. Nothing fancy

Conveyor Belt? I must have missed that conversation. Do you have any specifications on what type of conveyor?

Hi:

Does anyone have anything to add from Friday's meeting? I received

notes from Peter and Lyndsey. If not, I will incorporate into revised document to capture all of our input for the upcoming mobilization.

Thanks

From: Daly, Eric
